

PE ANTIBLOCKING/SLIP 01799

Composition: VIBATAN PE ANTIBLOCKING/SLIP 01799 is a 10% dispersion of ultramicronized natural silica and 5 % of erucamide in polyethylene.

Application: VIBATAN PE ANTIBLOCKING/SLIP 01799 is designed for extrusion of polyolefine films, especially when in addition to an excellent antiblocking effect a good slipping action is requested as well.

The silica shall reduce the adherence between the film surfaces and the collect structure during production. As a consequence, production speed is immediately increased and equipments are easily set.

VIBATAN PE ANTIBLOCKING/SLIP 01799 does not interfere on the transparency of the end-product.

In case of other application than the ones herein suggested, it is highly recommended to contact VIBA Customer Assistance before using the product.

VIBA will not be held responsible for production problems due to use of the product other than those mentioned above

Dosage: Suggested from 2,0 % up to 4,0 % according to desired antiblocking/slipping features.

Packaging: VIBATAN PE ANTIBLOCKING/SLIP 01799 is delivered in kg 25 bags on kg 1250 shrink wrapped pallets.

Shelf life

9 months from production date
