

PP ANTIOX 02572

Composition: VIBATAN PP ANTIOX 02572 is a dispersion of a special and innovative phosphite/phenolic blend in polypropylene.

Application: VIBATAN PP ANTIOX 02572 has been expressly developed for the extrusion of polypropylene filaments, ribbons and films. The use of VIBATAN PP ANTIOX 02572, which contains the special phosphite/phenolic blend, gives the following benefits:

- Half dosage compared to traditional antioxidant agents;
- High stability to colour variations, the typical yellowing of antioxidant agents;
- High thermal stability with a consequent melt stability;
- Low interaction with nitric oxide.

In case of other application than the ones herein suggested, it is highly recommended to contact VIBA Customer Assistance before using the product. VIBA will not be held responsible for production problems due to use of the product other than those mentioned above.

Dosage: 1,00% - 2,00% PP

Packaging: VIBATAN PP ANTIOX 02572 is supplied in kg 25 bags on kg 1250 shrink wrapped pallets.
